Overview

Best Ever APY is positioned to lead a revolution in Defi – **First Initial Large supply Auto Staking and Compounding Protocol**, a new financial protocol that makes staking easier and gives \$BESTAPY holders the highest stable returns in crypto. This protocol is equipped with innovative technologies and features not currently present in other project. It is specially designed to be automated and efficient. Best Ever APY Staking Protocol gives the \$BESTAPY token automatic staking and compounding features, and the highest Fixed APY in the market 1284615.72%. The Best Ever APY rewarding protocol generates and distributes a 0.018% reward every 10 minutes for all active users.

Our Mission

We aim to build a platform to simplify the user experience for non-experienced crypto users. Our project provides a perfect gateway to Defi with friendly functionalities for everyone including those who are completely new to Defi, and especially those without prior exposure to cryptocurrencies. We believe that simplifying user experience can create the potential for an exciting future for the growth of Best Ever APY enabling it to reach its goal of becoming the best ever Defi platform.

Key Features

Highest Fixed APY

APYs that fluctuate means you can never tell how many tokens you will receive. Other DeFi protocols pay out a high APY that can fluctuate by 90% in 24 hours. Best Ever APY staking pays \$BESTAPY holders a fixed interest rate of 0.018 % daily or with compounding 1284615.72% annually, that tops the industry.

Easy and Safe

We provide auto staking right in your wallet when you purchase \$BESTAPY. There is no need to move your tokens to our website. From the minute you buy, you are staked, and set to receive rebase rewards. The easiest auto-staking in DeFi.

Auto-Liquidity

A 3% tax on all buy and sell transactions is automatically added to the liquidity pool thus increasing the token's overall LP and supporting the price floor of the token. This is different from the burn function of reflection tokens which is only beneficial in the short term from the granted reduction of supply. **The Liquidity is locked for 1 million years.**

Key Features

Fast Rebase Rewards

Other common staking protocols give rebasing incentives every 8 hours, which implies that if you want to unstake, you must time it correctly. The Best Ever APY staking Protocol rewards every 10 minutes.

Burn Mechanism

1% auto burning is another feature provided by the Best Ever APY protocol. The goal of token burning is to remove a certain quantity of tokens from the circulating supply. Burning the tokens reduces the circulating supply, increasing the price and enhancing stabilization. **25% of the \$BESTAPY circulating supply is already burned.**

BEAPY Treasury

The Treasury supports the growth and long-term viability of The Best Ever APY protocol. It serves as an additional source of funding for the CIF. This support is important in maintaining a stable price floor for the \$BESTAPY token.

Insurance Fund

The Best Ever APY Insurance Fund serves as a backup for the rebase rewards, ensuring a stable interest rate for the holders of \$BESTAPY. 4% of all trading fees are sent to the Insurance Fund increasing price stability and enhancing overall sustainability and growth of Best Ever APY.

How does the Auto Stake feature work?

The Best Ever APY staking feature is a simple yet cutting-edge function dubbed Buy-Hold-Earn, which provides \$BESTAPY holders with the utmost convenience.

Buy-Hold-Earn – By simply buying \$BESTAPY and holding the tokens in your wallet, you earn rebase rewards directly into your wallet. Your tokens will increase every 10 minutes.

The Best Ever APY uses a Positive Rebase Algorithm to provide for daily token distribution that is directly proportional to the daily rebase incentive, worth 0.018% percent of the \$BESTAPY tokens held in your wallet. The rebase payments are awarded to all \$BESTAPY holders at each rebase period. This means that \$BESTAPY holders earn an annual compound interest rate of 1,284,615.72% without having to remove their tokens from their wallet.

\$BESTAPY Token

\$BESTAPY is the native token on the protocol which also serves as the network's native currency. All rebase interests are paid in \$BESTAPY along with many other utilities of this token. \$BESTAPY is a BEP20 token with an elastic supply that rewards its holders with a positive rebase formula, thus creating a cutting edge Auto Staking and Auto Compounding protocol.

By combining the power of blockchain and cryptocurrency we created a token that is better than any other token available in the market, with a higher staking reward. \$BESTAPY is the first crypto project with an actual utility on top of the community's efforts to grow. You probably already know this, but with \$BESTAPY you will earn the highest and the best ever profits on your investment

NFTs and Play to Earn Game

The Best Ever APY will utilize a Play to Earn Game and Non-Fungible Tokens to empower their holders and users. By playing the game, holders and users can earn passive income rewards. The team's mission includes building an NFT Marketplace where users can trade their rebase supported NFTs.

Fee structure

Buy Tax: 12%

- Liquidity Pool: 3%
- Insurance Fund: 4%
- Treasury : 4%
- Burning: 1%

Sell Tax : 12%

- Liquidity Pool: 3%
- Insurance Fund: 4%
- Treasury : 4%
- Burning: 1%

Roadmap

Phase 1

- Website Launch
- Initial Contract Audit
- Birth of Best Ever APY
- 5,000 Telegram Members
- Auto Staking Protocol Goes Live

Phase 3

- 30,000 Telegram Members
- 20,000 \$BEAPY Holders
- NFT Minting & Marketplace Development
- Large Scale Marketing
- CEX Listing

Phase 5

- 100,000 Telegram Members
- 100,000 \$BEAPY Holders
- ETH Bridge Development
- ETH Bridge Launch

Phase 2

- P2E Game Development Begins
- CoinGecko & CoinMarketCap Listing
- Logo on Metamask & Trust Wallet
- 15,000 Telegram Members
- 10,000 \$BEAPY holders

Phase 4

- 60,000 Telegram Members
- 40,000 \$BEAPY Holders
- P2E Game Release
- NFT Marketplace Goes Live
- Mass Marketing & Adoption
